Setting “Snap To” in Windows XP

“Snap To” causes the mouse cursor to automatically go to the “default button in a dialog box”.

To change how the mouse pointer works...

1. Open Mouse by navigating to Start button > Settings > Control Panel > Mouse.
2. The Mouse Properties dialog box will open...click on the Pointer Options tab, and then do the following:
 - Click on the Snap To box. Then click Apply and then OK.
