Setting “Sticky Keys” in Windows 7

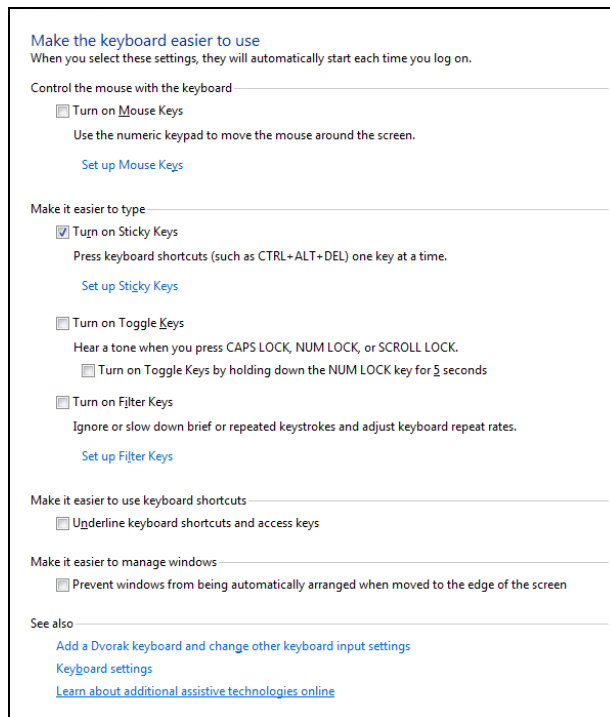

Sticky Keys enables the user to use keyboard combinations while only holding down one key at a time. Instead of having to press three keys at once (such as when you must press the CTRL, ALT, and DELETE keys together to log on to Windows), you can press one key at a time by turning on Sticky Keys. Then, you can press a modifier key (such as CTRL, ALT, the Windows Key, or Shift) and have it remain active until another key is pressed.

To turn on Sticky Keys:

To turn on Sticky Keys using mouse actions:	To turn on Sticky Keys using mouse actions:
To open the Ease of Access Center, select: <ul style="list-style-type: none">• Start.• Control Panel.• Ease of Access.• Ease of Access Center.	To open the Ease of Access Center, press: <ul style="list-style-type: none">• Windows logo key +U.
Under Explore all settings select: <ul style="list-style-type: none">• Make the keyboard easier to use.	Under Explore all settings, select: <ul style="list-style-type: none">• Make the keyboard easier to use by

	pressing TAB, then ENTER.
Under Make it easier to type, select: <ul style="list-style-type: none"> • Turn on Sticky Keys. 	Under Make it easier to type, select: <ul style="list-style-type: none"> • Turn on Sticky Keys by pressing ALT+R.
